

KILBRIDE FARM SIMMENTAL

Welcome to our heifer sale to celebrate the 50th anniversary of our Kilbride Farm Simmental herd. The herd was established in 1971 by the importation of four heifers from Germany, followed by six the next year also from Germany. After this only a small handful of specially selected females were purchased over the fifty years. The most significant of these was Carn Eunice, bought from Jim McCarrroll in Donegal. This heifer is the matriarch of one of the best known and prolific families in the breed. To date around four hundred Eunices have been registered in the herd.

After using A I in the early years it was decided that if we were to establish a herd of similar types, we would have to introduce stock bulls. This has been our policy over the years, and we have bought bulls that we thought would contribute to our plan, regardless of cost and wherever they were available.

In the early years we had much success in the show ring including the first ever Simmental Interbreed Champion at the RUAS and the Male and Reserve Champion at The Royal Show. However, a decision was taken in 2000 to cease showing as it was not making any contribution to our business, also our customers were demanding higher health standards and we thought this could be most easily achieved by not taking stock out and bringing them home again. Our policy of concentrating on bull sales has been very successful, we are very proud to have produced seven Supreme Champions at the Perth and Stirling Sales, with many high prices up to 22,000 guineas.

It is always satisfying to see bulls we have bred doing well in other herds and with A I Companies. Semen and embryos have been exported to many parts of the world; the Kilbride Farm prefix is recognised in most countries where Simmentals are bred.

We have participated in performance recording schemes since these were first available in the early years, and these play an important role in our stock selection. We also began introducing the polling gene into the herd thirty years ago, and about half the females are now polled.

The history and progress of the herd, gleaned from our scrapbooks and Billy's memoirs, can be viewed in a series of videos on the Kilbride Farm YouTube and Facebook sites.

We decided to celebrate our Golden Jubilee with the breed by offering this select group of heifers from across the cow families in the herd for sale. Normally all these would have been retained. They have been prepared naturally with no washing or grooming to give potential purchasers confidence in what they see.

All photographs and videos have been taken in the field by ourselves.

Starting off the sale, Eunice 291K is a rare chance to buy a full sister to the 10,000 gns Kilbride Farm Gruffalo P, who is breeding so well in Scotland and here at home with us. Her dam has been a great breeding cow and her grand dam Eunice 2nd was a tremendous breeding polled Milnaflua Graduate cow on whom a lot of our polled breeding was based, we still have 3 daughters in the herd all breeding very well. 291K is incalf to K F Jetstream P, due 29/10/21

Dora 96KP is a typical example of a K F Hans PP daughter, with great depth of body and hindquarters along with easy fleshing. Like his father semen has been exported all over Europe and embryos sired by him have been exported to Australia. The dam of 96KP was a massive deep bodied Cairnview Snazzy cow whose full sister, Dora 67E, was sold privately to the Cwarre herd. Scanned incalf to K F Jetstream P. We have the first two Hans PP daughters calved this spring both with plenty of milk.

Out of a very strong Corskie Damario daughter, with Cairview Snazzy and Seaview Prince Charming in the background, this is the first of several K F Gruffalo P daughters in the sale and is a very easy fleshed sweet correct heifer with natural thickness and fleshing. Her maternal half sister, Eunice 278JP by Imperator PP, has been retained and is calved with a super calf. Eunice 297K is incalf to Kilbride Farm Jetstream P due approximately 17/01/22. K F Gruffalo P has been producing top class bulls and heifers and is used regularly on heifers as he is also easy calved. We have several Gruffalo P daughters calved to Jetstream with very nice smart calves.

Jolly 25KP is another typical well muscled, fleshy Gruffalo P heifer out of possibly the widest cow family in the herd. The Jolly family although small in number has produced some of our highest priced bulls, including Tweed 13,000gns, Foreman 22,000gns and Glenhead P sold privately to AI Services. The first calf from her dam Jolly 17GP, Kilbride Farm Italy PP sold for 7,500gns. Jolly 25KP is incalf to Kilbride Farm Jetstream P, due approximately 03/02/22. Jetstream P has been a very good cross onto Gruffalo P daughters producing very nice easy born calves.

This is a chance to buy a Brenin heifer. We very rarely sell them. Her dam was possibly one of our best Snazzy cows breeding many high priced bulls as well as super heifers. Eunice 306k's full sister bred, K F Haka, sold to the Corskie herd for 10,000gns. Her full brother I-Catcher sold for 6,500gns and her half sister Eunice 188F bred K F Kinsman P who sold privately to the Breaghy herd and is now used in British simmental promotional material.

Laura 37LP is a very long stretchy polled Harvest heifer going back to the great Laura 5VP. Her dam is a maternal half sister to Gernot P, sold to Curaheen and Kaiser PP sold this year to Coney Island Genetics. Islavale Harvest progeny all have great style and character like their sire who has developed into a big square bull. He has been easy calving as well.

This young heifer is only being sold as we have already four full sisters retained. The sisters of Iris 25LP which have calved have all good calves. Her dam is a magnificent cow, Iris 17F, who was voted 3rd best cow in the the European virtual show last year. Iris 17F is almost a full sister to Kilbride Farm Escalop who sold privately to Bova AI Station. Escalop had a 400 day weight of 860Kg.

The first daughter of Kilkitt Jagerbomb offered for sale. Jagerbomb is producing cattle with size and power. 263 IP is another feminine Imperator daughter from a strong female line going back to Kilbride farm Vaten who was a full brother to the dam of Doubleaction who sold to Blackford for 18,000gns

Jolly 28L is another very stylish Harvest daughter with a lot of money in her pedigree! By the 16,000gns Islavale Harvest out of a full sister of the 22,000gns Kilbride Farm Foreman. Her granddam is the full sister of K F Movice who sold to Delfur for 7,500gns. The Jolly family is possibly our widest cow family and although small in number has been very successful.

Gruffalo P is producing very good stock and this is another example. Sneumgaard Imperator PP daughters are maturing into very nice feminine, fleshy cows with loads of milk and great temperament. Eunice 208GP's first 2 heifers have been retained including the full sister of 313 LP. K F Gruffalo's first daughters calved this spring with excellent calves.

A heifer with tremendous size, power and width. She had a faster growth rate than most of the bull calves a similar age! 314LP has a back pedigree full of big strong good breeding cows going back to the Milnafua Graduate daughter, Eunice 34S. Her sire, Hans PP, goes back to K F Fanni 9V who also bred the 12,000gns Kilbride Farm Bantry. The full sister of 314LP has been retained.

Like a lot of these heifers, this young lady has a back pedigree containing some of what we think of as our best cow lines. As can be seen, Curaheen Gunshot P is breeding so well onto Imperator daughters leaving very classy heifers.

Crugmelyn Brenin

Brenin was bought privately after winning his class at the English National show. Sired by Raceview King he is a big heavy muscled bull with tremendous feet and legs and a good temperament. All these traits are being passed on to his progeny which are very highly sought after. He has been consistently one of our top sires with bulls selling up to 22,000gns. His daughters are now some of the best looking best breeding cows in the herd. They are long good bodied cattle with great feet and udders. Many farmers who purchase a Brenin bull come back for another.

<http://www.kilbridefarm.co.uk/crugmelyn-brenin.html>

Sneumgaard Emperor PP

Emperor PP was bought as a 3 month old calf when he was already showing potential. He is a long clean bull with plenty of shape and good feet and legs. He has tremendous growth rate with a 400 day weight of 864 kg and a very good muscle scan. Emperor is also Homozygous polled. Because of the quality of his progeny across a large number of herds he has quickly gone from virtually no figures because he is imported to a trait leader in 5 different traits! His offspring are well muscled easy fleshing cattle with unbelievable good temperament. Two sons and one grandson have already been sold to AI companies. Many commercial farmers comment on the easy calving but also the growth rate afterwards and that they often overtake bigger calves within a short time. His first daughters are now calving for the third time and they are developing into wide good calving docile females with plenty of milk.

<http://www.kilbridefarm.co.uk/sneumgaard-emperor.html>

Kilbride Farm Hans PP

Hans PP is a big fleshy dark red homozygous polled son of Emperor PP out of a Hoeness daughter of the great cow Fanni 9V who also bred Kilbride farm Bantry who sold for 12,000gns in Stirling and went on to be very successful in his own right Like his father he has been easy calved producing predominately red cattle with his fleshing characteristics. His heifers are particularly nice and a son, Kaiser PP has been sold to an AI company.

<http://www.kilbridefarm.co.uk/kilbride-farm-hans-pp.html>

Kilbride Farm Gruffalo P

Gruffalo P is a son of Crugmelyn Brenin and has tremendous conformation, legs and feet. He is out of a great breeding polled Kilbride Farm Newry cow. Semen was collected for our own use before he was taken to Stirling where he was placed 1st in his class and sold for 10,000gns. He has been very easy to calf and is leaving very smart cattle similar to himself. His first daughters have grown into big framed heifers, the first of which are now calved with excellent calves mostly by Kilbride farm Jetstream P
<http://www.kilbridefarm.co.uk/kilbride-farm-gruffalo-p.html>

Islavale Harvest

Harvest was purchased in Stirling for 16,000gns. We liked his style, breed character and correctness, all of which he is passing on to his progeny. His sons have been quickly snapped up by buyers in the pens at home and his first daughters are coming to calf now. He has been very easy calved and the calves thicken out very quickly with tremendous backs particularly.
<http://www.kilbridefarm.co.uk/islavale-harvest.html>

Corskie Damario

Damario was placed first and reserve senior champion in Stirling. He was purchased for his power and fleshing ability and we had liked his sire, Greencap Ace, as a young bull and he is from a very strong dam line. He has done the job he was bought for and left us some very powerful, correct cows which are constantly breeding very well producing good calves to a variety of bulls
<http://www.kilbridefarm.co.uk/corskie-damario.html>

Kilbride farm Jetstream P

Jetstream P was retained after we lost his sire Emperor PP. He was a stand out calf from a great female line. His mother is virtually a full sister to Kilbride Farm Dragoon. Jetstream P has extremely high terminal and maternal figures. His first calves are now on the ground, easily born and we are very pleased with them. They are long, mostly red, stylish calves and we have high hopes for them.
<http://www.kilbridefarm.co.uk/kilbride-farm-jetstream-p.html>

Kilkitt Jagerbomb

Jagerbomb was purchased in Roscommon and is producing powerful thick cattle. His first sons will be offered for sale in Stirling this autumn.
<http://www.kilbridefarm.co.uk/kilkitt-jagerbomb.html>
